

Reading Long Term Plan

Intent

At Nether Green, our reading curriculum has been developed to enable our children to become lifelong readers. The reading culture in our school allows our children to see beyond what they know, to share cultural experiences and to understand and appreciate the world around them as well as to develop the vocabulary they need to effectively express themselves.

First and foremost, our children are taught to read accurately, fluently and with understanding applying their knowledge of structured synthetic phonics in order to decode unfamiliar words with increasing accuracy and speed. Where necessary, support with phonics is in place.

During their time at Nether Green, our children will develop a good linguistic knowledge of vocabulary and grammar and read and respond to a wide range of different types of texts. This is taught in a variety of ways. Every class listens to a class book every day and has time to read for pleasure every day. The class book is discussed in reading sessions and the children are able to develop their inference vocabulary skills while delving deeply into the narrative. Alongside this, reading fluency and explicit comprehension skills are taught using a variety of texts linked to science and foundation subject learning, as well as exploring poetry, picture books and current affairs. In writing lesson, children are further exposed to a variety of quality texts, developing their understanding of authorial intent and purpose. Poetry is taught half termly, children analyse and perform a wide variety of poems.

In addition to this, all pupils have access to wide variety of literature, both fiction and non-fiction, in well stocked and organised class libraries.

Our aim is that our children will be able to read fluently, and with confidence both for pleasure and in any subject in their forthcoming secondary education.
